

Wholesale and Distribution Services
PDMX Warehouse

Operational Excellence

High efficiency at ease

ProCons Joined forces with ProDumex in order to offer a solution that caters the specific needs of small and midsize enterprises of the Wholesale and Distribution industry in the MENA region.

PDMX Warehouse Management is an industry-specific solution that has certified integration with SAP Business One. It has been developed to provide greater control and documentation of logistics on the shop floor or in the warehouse.

For logistics and wholesale distribution companies, its tracking and tracing functionality, complements SAP Business One and adds unique functionality for businesses in the food and pharmaceuticals sectors. PDMX Advanced WMS communicates with operators on the shop floor via handheld terminals or touch screens.

From purchasing, goods receipt and storage, labeling, route planning, inventory management, production, and packaging to the eventual dispatch, this fully integrated system guarantees total traceability throughout the supply chain.

Some of the included features that add great value to the solution are:

- **Purchasing**
- **Goods receipt and storage**
- **Labeling, route planning**
- **Inventory management**
- **Production**
- **Packaging to the eventual dispatch**

This fully integrated system guarantees total traceability throughout the supply chain.

The Key Features

Administrative functions streamline operational processes (e.g., goods receipt, put away, packaging, picking and shipping).

Logistic shop floor functions run through easy-to-use graphical touch screens or handheld devices.

Full traceability and audit trail.

Advanced location management features enable you to define any number of levels that are graphically displayed (e.g., bulk locations or multi-bin levels, warehouse sections, and computer/handheld devices).

PDMX Advanced Warehouse Management System (WMS)

The Produx PDMX Suite Solution for SAP Business One currently constitutes an integrated software solution covering functional areas such as:

- Advanced Warehouse Management
- Production & Packaging
- Value Added Logistics for Third Party Logistics
- Quality Management
- Traceability
- Serialization Management

The PDMX Suite for SAP Business One is specifically suited for industry segments such as food & beverage, life sciences, wholesale & distribution and third party logistics.

Competitive advantages

- Fewer errors and greatly reduced costs through automation of logistic processes, including goods receipt put away, packaging, picking, and shipping.
- Reliable and up-to-date information about inbound and outbound shipments, as well as current inventory levels.
- Guaranteed compliance with both legal requirements, such as traceability, and customers' requirements, such as accuracy, speed, flexibility, transparency, and efficiency.
- Paperless warehouse with handheld devices.
